CAREER OBJECTIVE

Specializing in **Next.js** and the **MERN stack**, with a focus on building secure, logic-heavy, and multi-tenant applications. Adept at engineering complex data aggregation pipelines, role-based dashboards, and automated payment gateways to bridge structural logic with scalable web architecture.

TECHNICAL SKILLS

- **Frontend:** Next.js, React.js, Tailwind CSS, HeroUI/DaisyUI, HTML5, CSS3
- **Backend & Database:** Node.js, Express.js, REST APIs, MongoDB
- **Tools & Security:** BetterAuth, JWT, Stripe API, Git, GitHub, Vercel, Render
- **Interpersonal:** Strategic Communication, Presentation

PROJECTS

Healora — *Doctor Appointment Platform* [[Live Link](#) | [Client Repo](#) | [Server Repo](#)]

- Transformed manual **healthcare** scheduling into an automated booking system with real-time double-booking protection.
- Eliminated multi-user coordination friction in **HealthTech** by implementing role-based management dashboards for patients and doctors.
- Resolved unverified **clinical** booking dropouts by integrating Stripe API payment webhooks for automated verification.
- **Tech Stack:** Next.js, TypeScript, React, Node.js, Express.js, MongoDB, Stripe API, Tailwind CSS

Gym Buddy — *Fitness Management Platform* [[Live Link](#) | [Client Repo](#) | [Server Repo](#)]

- Overcame operational data bottlenecks in **fitness management** by executing high-performance MongoDB \$facet pipelines powering real-time administrative analytics charts.
- Eliminated slot overbooking and double-charging risks by engineering multi-step server-side validation checkpoints prior to Stripe checkout initialization.
- Configured MongoDB \$regex text search with active **API security mechanisms**.
- **Tech Stack:** Next.js, React, BetterAuth, MongoDB, Stripe, Framer Motion, HeroUI

YourShop — *AI E-Commerce Platform* [[Live Link](#) | [Repo Link](#)]

- Transformed static **RetailTech** browsing by embedding an autonomous Gemini-powered streaming AI concierge for real-time product query resolution and context-aware recommendations.
- Streamlined **e-commerce** product discovery and eliminated visual layout shifts by implementing Suspense-driven skeleton loaders alongside dynamic multi-criteria search indexing.
- Enforced **protected client/server routes** and secure authentication workflows for dynamic cart states.
- **Tech Stack:** Next.js, TypeScript, React, Node.js, Express.js, MongoDB, Tailwind CSS

EDUCATION

Comilla University — *B.A. (Honours) in English Language and Literature (2023-Present)*

LANGUAGE PROFICIENCY

English: Fluent

Bengali: Native
